

"SMART SOLAR SOLUTIONS"

THE BENEFITS OF OWNING A SOLAR SYSTEM

30% Tax Credit	Tax credit applies to you because you own the solar system.
Cash Rebate From Utility Company	Cash rebate is awarded to you because you own the solar system
Stable Monthly Cost	Fixed interest payments are available from many sources which can lock in your investment
Reduction Of Your Current Electric Bill	When you purchase a solar system, you own the system. The money that your system will save you on your electric bill will have increased over time because electric rates will rise and this non-taxable income will go right into your pocket year after year.
Benefits When Selling Your Home	Homes that are sold with a solar system included in the purchase price can sell for more money than homes without a solar system. Since you bought the solar system, you own it and you can do whatever you want. You can move the system to your new home or you can sell the system as part of the home's sale which will improve your home's sale price and its marketability.
Solar System Ownership/Equity After Completion Of Financing	After you complete the financing of your solar system, it will continue to produce free electricity for many years to come. In fact, the solar panels typically come with a 25 year warranty and have a life expectancy of more than 40 years.
Renewable Energy Credits (RECs)	Renewable Energy Credits apply to you because you own the solar system.
System Maintenance	That's the beauty of owning your own solar system. A properly installed solar system needs virtually no maintenance other than a good rain or a rinsing off every few months of accumulated dust on the solar panels with a simple garden hose.
